

BODEDE SODIQ

Full-Stack Web Developer (Backend-Focused)

Lagos, Nigeria | 08080061178 | younghustler252@gmail.com

GitHub: github.com/younghustler252 | LinkedIn: linkedin.com/in/bodede-sodiq-365790335

Portfolio: young-tech-portfolio.netlify.app

PROFESSIONAL SUMMARY

Full-stack web developer with a backend-first mindset, experienced in building production-ready systems using Node.js, Express, MongoDB, Redis, and background job processing. Strong focus on clean architecture, secure API design, performance optimization, and scalable backend solutions that support real-world usage.

TECHNICAL SKILLS

Languages: JavaScript (ES6+)

Frontend: React, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST API Development

Database: MongoDB

Caching & Async: Redis, BullMQ

Security: JWT, Role-Based Access Control

Concepts: API Design, Asynchronous Processing, System Architecture, Performance Optimization

Tools: Git, GitHub, Netlify

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer — Wifispace Unlimited Networks (Contract)

2024 – Present

- Designed and maintained scalable backend services using Node.js and Express for production systems
- Architected RESTful APIs enabling secure, efficient frontend–backend communication
- Implemented Redis caching to reduce database load and improve application responsiveness
- Built background job workflows with BullMQ to support asynchronous and non-blocking operations
- Implemented authentication and authorization mechanisms to secure APIs and sensitive data
- Contributed to backend architecture decisions with emphasis on clean code and long-term maintainability

SELECTED PROJECTS

EveryVoice – Blog Platform

Technologies: React, Node.js, Express, MongoDB

- Developed a role-based content platform with protected routes
- Optimized client-side data handling using React Query for caching and background synchronization

Young GadgetHub – E-Commerce Platform

Technologies: React, Node.js, Express, MongoDB

- Built an e-commerce application with search, filtering, and pagination
- Integrated frontend UI with backend APIs for real-world shopping workflows

Vendor Ordering App (Mobile-First)

Technologies: React, Tailwind CSS

- Designed a mobile-first ordering interface for small vendors
- Structured product catalogs and order views to reflect real operational use cases

EDUCATION

Self-Taught Full-Stack Web Developer

WAEC / SSCE – Nigeria
